

# KALA SHREE UV

kalashreeuv29@gmail.com | 7867999970 | LinkedIn | GitHub

---

## OBJECTIVE

Enthusiastic and forward-thinking individual with strong technical skills and a creative approach to problem-solving. Seeking an entry-level role to contribute meaningfully to team objectives and grow professionally in a dynamic environment.

---

## EDUCATION

MCA | SRM Institute of Science and Technology, Kattankulathur 2024-2026 | CGPA: 9.09(Current)

BCA | SCSVMV University, Kanchipuram 2021-2024 | CGPA:9.04

---

## TECHNICAL SKILLS

- **Programming Languages:** Python, Java
- **Web Development:** HTML, CSS, JavaScript
- **Databases:** MySQL

---

## INTERNSHIPS

**AI Intern, Barola Technologies, Chennai** **June 2025**

- Gained hands-on experience in Artificial Intelligence by working on real-time projects involving face recognition, OCR, and object detection using Python and OpenCV. Applied core Machine Learning concepts in practical scenarios, including dataset preprocessing, model training, and real-time implementation.

**Web Development Intern – Unified Mentor (virtual)** **May 2025 – June 2025**

- Developed responsive, cross-browser-compatible web pages using HTML, CSS, and JavaScript, integrating them with back-end APIs to create interactive user experiences. Gained hands-on experience in full-stack development workflows, including client-server interactions, front-end optimization and dynamic content implementation. Contributed clean, maintainable code in a collaborative, remote team environment

---

## PROJECTS

- **Inter-College Event Management System** - Developed a system where students can register for competitions, staff can manage and update events and administrators can assign tasks, streamlining coordination and improving workflow efficiency.
- **AI-Based Real-Time Face Recognition System** - Built a real-time face recognition system by collecting datasets, training models, and implementing live recognition with alerting features for security and criminal identification, creating an efficient and reliable system.
- **Weather Forecast Application** - Created a responsive weather web app that provides real-time weather data with dynamic visual indicators. Integrated external APIs to deliver accurate, up-to-date information, ensuring a user-friendly and interactive experience.
